

I would respectfully urge you to REJECT NAB Petition 04-160.
I am appalled that the NAB is attempting to limit m programming choices on a service that I choose to pay for. The quality of the programming available on XM radio make it my first choice for listening, and the weather and traffic channels are an important part of the information available to me.

Please do not allow the NAB to use you to eliminate competition. I guess they feel that their only recourse is to use the government to compete, instead of urging their members to develop more meaningful and desirable programming.

Thank you,

Mark Beers
